introduction

GS Fine Wines was born from the need of many producers to engage international audiences and allow them to taste their excellent wines

We represent independent wineries from Spain; all of them medium-sized producers that produce quality wines and have full ownership of their land and vineyards

Outstanding wines that represent the excellence of every region; wineries that are fueled by passion history and knowledge

1356

D.O. NAVARRA

The document of **La Saca de Lerín** (1356) describes how 250 bags of 96,000 liters “of national export” come out in just five months. Since then, we continue **to be proud of that tradition** that parents to sons winegrowers have passed on to us as ancestral pruning and vineyard techniques that make us good **soil sniffers, suitable varietals, and harvesting their ripe grapes at their optimum point.**

Some of the youngest winegrowers firmly believe in this **centuries-old project** that continues to link us to the land of the town of Lerín. With these foundations, **Bodegas Alconde** was born in 1956. We have great vineyards, family secrets, the same vocation “Exporter”, but a very modern new way of tasting and understanding wines.

D.O. RIOJA ALAVESA

Founded in **1969** thanks to our father Vicente, his brother Fernando and the push of our mother Loli. They knew how to transmit everything they had learned and **respected the vineyards that our grandparents had planted**. We are a family dedicated to wine in **Rioja Alavesa** for more than **4 generations**.

The family character of our winery and the generational change is guaranteed since since 2000 it has been directed by **Vicente and Gabriel Frías del Val**, the new generation that has managed to provide a more up-to-date vision, pampering the vineyards and respecting the family tradition. Our philosophy is to **treat wine with the utmost respect and affection, to travel with it through time**.

D.O. GETARIA

Akarregi Txiki is a traditional winery that has been making wine in this farmhouse for several generations. Located on the slopes of **Getaria**, the Akarregi Txiki farmhouse has its own area of approximately **17 hectares**.

In Akarregi, txakoli is made following the most traditional methods under strict and rigorous control. Advances in the field of wine technology have achieved great achievements in favor of a considerable improvement in the fermentation process, **obtaining a product of extraordinary quality**.

D.O. CASTILLA Y LEON (GOLDEN MILE)

If we talk about Pago de la Oliva we are necessarily talking about a **Family**, the **Barbero José Barbero Capdevilla**, founder and visionary in his time, always knew that he wanted to have vineyards. A dream come true today where **the work of more than thirty years** dedicated to the vineyards has allowed us to see with pride how three generations work side by side in the fields and the winery.

Passionate about the countryside, agriculture and its vineyards.

In the field, he looked for the answers that nature itself told about where and how to do things, where to plant the vines, how to prepare the soil ... Always working with enthusiasm and with a philosophy of life: **"The only way is to do things from the best possible way"**.

D.O. GRANADA

Bodegas Muñana has a long **history** and **tradition**.

Located in the north of **Granada** (Spain), Bodegas Muñana maintains the tradition of a land in which the Romans made wine two thousand years ago, **is one the highest located wineries in europe**.

The village of Muñana used to be located right within the current vineyards. The Peñas Prietas Estate covers about **180 hectars** and reaches upto **1.200 meters above sea level**.

Our location, bordering the Sierra Nevada National Park and close to the Mediterranean sea creates very special climatic conditions, which allow the cultivation of a significant number of grape varieties, **superior to other geographical areas**.

The high altitude and temperature range between night and day, the low incidence of pests, more sunny days and lower environmental humidity produce a **slow and natural maturation**, causing the plant to develop in better conditions than in other latitudes.

BASQUE COUNTRY

Located in **Amurrio**, Licores Barañano is a business that maintains a **centuries-old family** tradition. Before **1831**, our great-great-grandfather **Mr. José Manuel Atxa Barañano** learned the art of alchemy from the hand of Mr. Paul Pomés. The family tradition of distillers and liquorists has made it possible that after **four generations**, Fabrica de Licores Víctor Barañano elaborates its products in a traditional way with the experience inherited from our ancestors and with the handwritten formulas of the 19th century jealously guarded.

Today, all this knowledge from years of work is adapted to the new times, new technologies and new market demands.
